Important:

For a 2 floor house, I won't actually use two in-game floors. Instead, I plan to build an additional structure on the first floor (ground floor).

This decision is based on the following reasons:

- Easier decorating
- Avoidance of floor or ceiling glitching problems

2 floor builds are not recommended for small houses

If there's a strong preference for using the existing in-game floors, it can be discussed, but it may come with a significant price increase and is generally not recommended.

If you're interested in my work, want to hire me, or have any questions and requests, feel free to send me a tell in FF14 or a message on Discord.
